Dorso

S-Line & N-Line

Dorso's distinctive thin profile is a unique achievement in seating. A proprietary process incorporates dual-density injection molded foam in its interior steel frame. The result is a chair that provides comprehensive support for the body's lumbar and thoracic regions. It conforms to the specific shape of every individual's back, seat and legs much more actively than plastic, and other less sophisticated foam systems.

Dorso S-line and N-line models also features a weave back option in five color options; Warm Grey, Tan, Sand, White and Black.

Dorso Guest

Dorso's attractive, contemporary look is carried over to an extensive range of guest seating: 4-legged, cantilevered, or on casters. Guest seating can be ganged, to allow for multi-functional applications. Dorso Guest also includes the N Line designed for more task-intensive environments.

Dorso

E-Line & T-Line

Incorporating the distinctive style elements of the extensive Dorso collection, Dorso E takes Dorso to a new level of comfort and support. Plush, curvaceous cushioning in the seat and back provide an exceptional sitting experience – whether for a brief meeting in a conference room, or for extensive hours at a desk.

Dorso Environmental

The use of recycled and recyclable materials, combined with environmentally-friendly production processes and packaging, have made Dorso a level™-certified product, and a contributor to LEED™-driven specifications. Dorso is certified by the Greenguard™ standard for indoor air emissions, and its unique capability for extending product life makes it a responsible environmental choice - and one that will provide exceptional return on investment over time.

Dorso Arm Styles

Adjustable Arm

Fixed Cantilever Arm

Armless

Upholstered Fixed Cantilever Arm

BACK HEIGHT

Back height adjustment is an option on Dorso E, T & N Line. It offers an adjustment range of 11 positions, over a 2" range of movement.

BACK TENSION

Back tension on the mechanism is controlled with an adjustment knob under the seat. It has been designed to provide a range of back tension adjustment suitable for users of varying sizes and preferences.

SEAT HEIGHT

In the seated position, a pull upwards on the height adjustment lever located under the seat of the user's right side adjusts the height up or down with a total height range of 4.5".

SEAT SLIDER

All Dorso tilters are available with an optional seat slider mechanism featuring a 2" range of adjustment front to back when seated. The lever to activate this feature is located under the seat of the user's right side and is activated by an upward pull of the lever.

DORSO CONTROLS

Dorso chairs feature synchro tilt mechanism. The tilt adjustment range offers five recline-lock positions, as well as free flowing movement. The forward pivot mechanism allows the back and the seat to articulate synchronously in a 2:1 ratio, the upward tilt of the seat is minimized as the back reclines.

ARM STYLES

Dorso chairs are available with fixed cantilever or adjustable arm, constructed of die cast metal with Black textured plastic arm pads. The adjustable arms feature seven height adjustment positions. Dorso S, T & E Line models are available with Black, Silver Metallic or Polished Chrome accent finishes to match metal base. Dorso N-Line arms, Fixed cantilever and adjustable arms, are available in black textured plastic. All Dorso models are also available in armless versions.

BASE STYLES

Dorso seating features injection molded, glass reinforced black nylon bases with dual wheel casters. Dorso S, T & E Line models feature optional Silver Metallic or Polished Chrome finish.

SOFT WHEEL CASTERS

Optional soft wheel casters designed to work on hard surface flooring such as wood, tile, marble etc.
