

# Jordan Glider

**krug** HEALTHCARE 

## Jordan Glider

The Jordan Glider is lighter-scaled, lower weight and dimensionally smaller than most sleep recliners, but maintains comfortable proportions for extended sitting, resting and treatment. It is a product that has some unique solutions to very real and practical needs and the perfect solution for patient rooms and treatment areas where available space and freedom of movement are important.

The Jordan glider is designed to move the patient in a smooth, flat arc that is gentle, soothing and safe. The position of the feet is maintained on the floor throughout the glider motion, rather than being raised up down in a rocking motion.

Fully Upholstered Arm with Solid Surface Arm Cap

### Jordan Glider Arm Styles

## Jordan Glider Flexibility

21" and 24" widths are offered, allowing flexibility in accommodating patients of different sizes, and providing for the comfortable use of bolsters, pillows and other means of support. Additionally, tablets and other accessories add convenience for the patient.

**MECHANISM**  
The Jordan Glider mechanism features a locking function so the glider can be used as a fixed chair and is replaceable in the field.

**CLEAN OUT**  
Jordan Glider seating models have a built-in clean out feature: a space at the back of the seat that allows dirt, debris and liquid to fall to the floor for easy clean up and maintenance.

**STEEL SEAT FRAME**  
The structural seat frame is made from welded steel with hardened steel bolts and inserts, ensuring exceptional durability and strength allowing Jordan Glider to well exceed ANSI/BIFMA.

**WALL SAVER DESIGN**  
The angle of the back and the rear legs are designed to keep the back away from the wall, in a locked position, to prevent wear and damage to both the chairs and to the walls of the facility.

**RECESSED FRONT PANEL**  
The Glider's front panel has an attractive arc that serves an important function: to provide safer ingress and egress by allowing the patient to get their feet underneath their weight.

**HEADREST**  
The headrest has a dual density foam for both comfort and support, and can be upholstered in matching or contrasting material. It is removable to allow for cleaning and replacement.

**COMBINATION UPHOLSTERY**  
Combination upholstery option includes more than one upholstery cover within the same unit. Back, Seat, or arms can be specified in a different fabric selection.

**REMOVABLE & REPLACEABLE COVERS**  
Removable seat and back covers can be easily removed for cleaning and disinfection or replaced if damaged.
