Leyton Behavioral Health

Krug, in consultation with senior healthcare designers and clinicians, has developed a series of highly functional, extremely durable, easily cleanable, attractive behavioral health furniture solutions containing numerous security features including ligature and elopement resistant designs, soft edges, restricted access points, tamper-resistant hardware and supplemental weight for enhanced patient and staff safety. The fulsome offering includes a broad range of options for dayroom, and activity areas as well as intake, consult spaces and waiting rooms. Most major components are field replaceable, ensuring minimal downtime for repairs and exceptional ROI.

Leyton Behavioral Health

Leyton Behavioral Health exemplifies sophisticated elegance while offering a multitude of standard features for enhanced patient and staff safety. Leyton's minimalist silhouette belies its heavy-duty robust construction which make it an ideal choice for intense environments. Standard safety features include tamper-resistant hardware, staple covers, secured glides and restricted access points. The contemporary base design can be bolted to the floor with optional anchor brackets, supplemental weight and a steel under-seat shield can be optioned to further increase staff and patient safety. The offering includes lounge chairs, loveseats, sofas and tables. Weight ratings for Leyton Behavioral Health range from 750 lbs-1200 lbs.

ARM STYLE
Leyton Behavioral Health features two design styles, Upholstered Full Arm and Upholstered Armless.

RESTRICTED ACCESS UPHOLSTERY
Restricted Access Upholstery significantly reduces the points on the product that could be used for ligature.

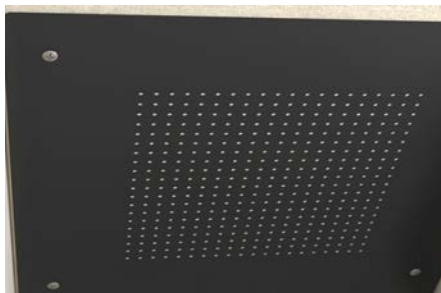

TAMPER-RESISTANT HARDWARE
This is utilized on all connection points of the product that are potentially accessible, hindering components from being removed or the product being dis-assembled. The unique tools for these fasteners are available from Krug.

UNDERSEAT SHIELD
The polymer shield is attached with tamper resistant hardware. It is designed to restrict access to the interior of the chair.

FLOOR ANCHORING
This can be provided when the product is ordered, or can be added in the field. In both cases, the fastening hardware attaching the steel floor anchoring brackets to the product is tamper-resistant.

SUPPLEMENTAL WEIGHT
The option of additional weighting can be specified, to specific weight requirements. Additional weight is achieved through steel plating that is fastened to the interior side of the Steel Bottom Shield, making it secure and inaccessible.

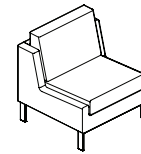

SLED BASE
The sled base features Polished Chrome structural steel with Black glides.

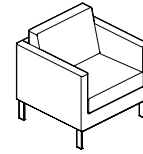

POLYMER PLINTH BASE
Leyton Behavioral Health lounge seating is available with an Grey polymer plinth base that restricts access to the interior of the chair and deters dirt and debris from accumulating under the chair.
