

Tate Bench Behavioral Health

krug HEALTHCARE 

Tate Behavioral Health

Tate features an elegant design and sophisticated lines. Built with safety features such as tamper resistant hardware and staple covers, Tate is an ideal choice for patient corridor seating, lobbies and common areas. Supplemental weight is optional as are anchor brackets to affix the sled base design to the floor. Tate weight ratings range from 975 lbs.-1,200 lbs.

FEATURES

FULLY UPHOLSTERED

Tate Bench features two design styles; Fully Upholstered & Full Gable End.

TAMPER RESISTANT HARDWARE

All screws used on all the Behavioral Health units have been replaced with tamper resistant security screws.

SECURED GLIDES

Tate Behavioral Health benches have their glides secured in place to hinder removal and damage.

BOTTOM SHIELD

The bottom shield hinders access to the interior frame and components, it has venting to allow circulation and is fastened with tamper resistant hardware.

OPTIONS

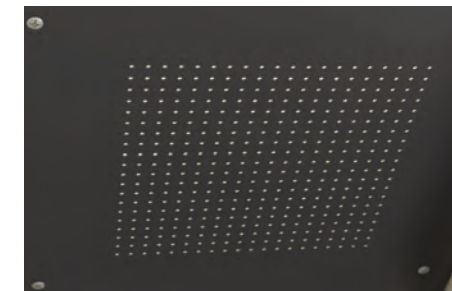

FULL GABLE END

This option has been designed with the closed end option to significantly reduce the points on the product that could be used for ligature.

FLOOR ANCHOR BRACKETS

Floor mounting brackets are supplied to secure to the bottom of the base. (hardware to attach the brackets to the floor is not provided by Krug.)

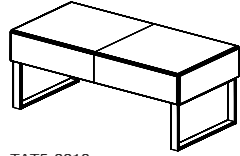

SUPPLEMENTAL WEIGHT

The option of additional weighting can be specified, to specific weight requirements. Additional weighting is achieved through steel plating that is fastened to the interior side of the Bottom Shield, making it secure and inaccessible.

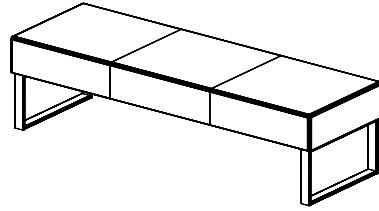

CAL 133 & MOISTURE BARRIER

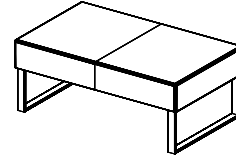

California Technical Bulletin 133 is an optional flammability test for seating. Krug offers a compliance method which, in combination with non-flammable upholstery covers, may enable the products to meet certification requirements for this test.
