

#### CLEAN OUT

All Jordan seating models have a built-in clean out feature: a space at the back of the seat that allows dirt and debris to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

#### METAL TO METAL CONNECTION

Steel seat frames are joined to other components, and to each other in the multiple seating products, with hardened steel bolts and inserts, ensuring exceptional durability and strength, and easy reconfigurability, as well as on-site replacement of damaged or degraded components.

#### URETHANE ARM CAP

The optional arm cap provides enhanced durability and protection for the arms. It is field replaceable if it becomes damaged or degraded.

#### REPLACEABLE SEAT & BACK COVERS

Jordan Multiple Seating can be specified with removable and replaceable seats and covers, to allow for cleaning, repair and replacement of upholstery. Complete seats and backs can also be easily field-replaced.

JOR2-G30OPU

JOR2-G21OPU

Replaceable seats and backs, as well as replaceable seat and back covers, and a full range of other replacement components – all designed to be quickly field-installed – allow damaged and degraded components and materials to be easily restored at low cost.

Jordan has been constructed to withstand the rigors of healthcare environments, and has been extensively tested to levels that well exceed established industry standards. Krug stands behind this collection with a lifetime warranty.

JOR2-G30OPS

JOR2-G21OPS

Designed in collaboration with several leading healthcare architects, designers, and professionals, Jordan is a collection that transcends conventional healthcare seating. A comprehensive research and design process has yielded a heightened level of aesthetic beauty, combined with exceptional ergonomic support and sitting comfort.

Jordan – defined as a “healing river” in ancient times – utilizes research-based curvature in both the seat and back to encourage correct yet comfortable sitting posture, with pronounced support for the lumbar and thoracic regions. “Waterfall” seat fronts and a canted seat angle are designed to help prevent discomfort for the user’s hips and legs, promote good circulation while in a seated position, and assist ingress and egress. A slight flexing action in the back promotes an upright sitting position that is still pleasingly comfortable.

**FEATURES:**

- Solid Beech or Maple Frames
- Structural Steel Seat Frame
- Field Recoverable Option
- Clean Out
- Replaceable Components
- Flex Back
- Wall-Saver Design
- Anti-microbial Finish
- Urethane Arm Cap Option
- Life Time Warranty

JOR2-G44OPS

Jordan guest seating exceed the 500 lbs weight rating. Jordan includes Bariatric models at 30” and 44” width that have strength properties allowing them to exceed an 750 lb. seat drop test, and a static backrest strength test of 450 lbs.

All Jordan products are air quality certified, and have been designed to achieve reduced environmental impact: steel and foam components utilize recycled, and recyclable, materials, and wood materials are sourced from certified, managed forests that utilize sustainable forest management practices. Krug maintains a comprehensive program of environmental practices that is measurably reducing the environmental footprint of the company and its products.

The arms of Jordan seating have been carefully designed for ingress and egress, with a rounded, easy-to-grip size and shape, and a forward height incline that supports the sitter’s movement and body weight as they move into and out of the chair.

Jordan features a proprietary anti-microbial finish, which actively resists the growth of germs, microbes and bacteria. These anti-microbial properties, combined with the exceptional strength, marring and chemical resistance of Krug’s Enduraguard finish system, provide a wood surface coating that is uniquely suited to the demands of a healthcare environment.
