NATURAL CHARACTERISTICS OF WOOD

Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES

Add 10% list to your order for special finishes, minimum upcharge is \$600 list per finish per order. (For example, on all orders up to \$6000 list, an upcharge of \$600 will apply, on orders \$6000 and up add 10% list to your order.)

For orders with special finishes, a sample that is a minimum 3" by 3" must be received with the order. Special finishes may add additional lead time to production schedules. Since wood is a natural product, some variations in grain, color, and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated

BIRDSEYE MAPLE

Bookmatched Birdseye Maple veneer is available on Millennium at an upcharge of **\$76 list per square foot**. Specify clearly on order. Birdseye Maple is recommended in clear finish only. Birdseye Maple only applies to tops.

Where there are wood profile edges on worksurface tops, they will remain as wood profile on laminate tops. Krug will order and procure laminates. When specifying laminate worksurfaces, the grain direction is such that the grain pattern runs the length of each surface, as shown in the diagram on the left.

Please contact Krug Customer Service for questions pertaining to laminate grain direction.

This finished cavity is accessed from the front of the desk by a hinged door and is completely concealed in the closed position. The wire management cavity includes a four receptacle power bar mounted on the inside pedestal gable. This feature allows the use of several powered items on the desk surface and greatly reduces the number of cables routed to the primary power source. The hinged cavity also effectively conceals all excess cables from view.

PEDESTAL ACCESS WIRING GROMMET

All Millennium desks allow for wire management behind the pedestal drawers. Pedestal gables feature a standard cable management opening allowing access to the rear of the pedestal cavity. By specifying a wiring grommet in a standard AL or AR position (see grommet locations on page 251, cable can be conveniently threaded behind the pedestal drawers and through the wire management access grommet.

Combined with our standard wire management cover, all cables are neatly tucked out of view.

BIRDSEYE MAPLE

Cords run down the right hand side of the tasklight to the worksurface where they can be routed behind the worksurface top. The use of a wall mounted tackboard conceals the cord from view. Tackboards must be ordered separately and can be specified in any fabric grade (1-9. Wall mounted tackboards for overheads are supplied with all necessary hardware for installation. Locks are optional on overheads and can be specified at time of order for an upcharge of **\$152 list per set** of (2) doors.

Glass doors on hutches are wood framed clear glass. A tackboard in Krug Momentum Panel grade 1 fabric is included with every hutch. Upcharges for higher graded fabrics are listed on page 297. Tackboard fabric selections should be supplied with the order information, fabric options are listed on page 4 of this price guide. Tackboards for hutches are installed at the factory and require no additional set up on site.

Hutches over 84" in length are made in two pieces and require special installation.

Hutches are available with a finished inside back panel at standard list price, but must be clearly specified on order. This option is available on hutches up to 84" in length only. This option does not include a tackboard. Locks are optional on overheads and can be specified at time of order for an upcharge of **\$152 list per set** of (2) doors.

HUTCH POWER DATA OPTION

Access to power and data is made simple by using a hutch with a power data module built right into the tackboard. The module is fully installed at the factory but can be removed to connect data links on site. It features a flip door that retracts into the case of the unit when open. See page 251 in the grommets section for complete power specifications

CONNECTING WORKSURFACES

It is important that the product is in its final position and the primary worksurface is leveled before connecting other joining pieces.

Detailed installation instructions are included with each unit, or available from Krug Customer Service.

Units are connected with mending plates under worksurfaces, and linking brackets on modesty and end panels. Locate connections and attach the mending plates under the worksurface. Level pieces if necessary by adjusting the glides to achieve flush and firm joints before completing installation of all hardware.

DRAWER REMOVAL

To remove pedestal drawers, open to the extended position, press down on the right side nylon release lever and pull the drawers up on the left side lever at the same time. Continue pulling the drawers out of the case.

GLIDE ADJUSTMENT

Raise one corner of the unit at a time and adjust the glide to the desired height by turning the glide in the hole. Make sure unit is level after adjusting the glides. Please note that the maximum adjustment range of the glides is 1 1/2". When moving units after glides have been inserted, dial the glides to the lowest position to prevent damage to the case.

BOOKCASE OR HUTCH DOOR ADJUSTMENT

Hinges on all hutch and bookcase doors are designed to be adjusted for depth, horizontal and vertical adjustment by means of screws into the hinge mounting plates.

To remove a door, squeeze the release clip and pull out the door, disconnecting the hinges.

OVERHEAD INSTALLATION

The wall mount overhead storage units must be installed on wall studs. The first step for installation is to locate the studs in the wall where the overhead is to be mounted. Measure the stud center line location and use this measurement to mark the hole locations on the mounting rail and the overhead back. Drill clearance holes at the hole locations. Hole requirements will depend on the fasteners chosen by the installer. 2 1/2" x #10 wood screws are adequate if going into wood studs. If studs cannot be accessed, then appropriate drywall plugs or butterfly bolts should be used. We recommend 2 fasteners per stud.

Fasten the mounting rail to the wall ensuring that it is level. Hang the overhead on the mounting rail and then fasten it to the wall. This prevents accidental removal and also allows for some leveling adjustment.

MILLENNIUM | HEIGHT ADJUSTABLE WORKSURFACE WITH BASE ENCLOSURE

Single Stage Mechanism With Base Enclosure

The Single Stage mechanism with Base Enclosure has an adjustable height range of 28 11/16 - 47 5/8 inches. When the work surface is at the lowest stage - desk height, the space between underside of the work surface and the top of the Base Enclosure is 1/2 inch.

Dual Stage Mechanism With Base Enclosure

The Dual Stage mechanism with Base Enclosure has an adjustable height range of 23 3/4 - 49 3/4 inches. When the work surface is at the standard desk height setting of 28 7/16", the space between underside of the work surface and the top of the Base Enclosure is 6 inches. This allows for the full range of height adjustments.

Custom Base Enclosures for the Dual Stage are available decreasing the gap below the work surface to 1/2 inch.

Caution: this eliminates the ability to use the lower stage settings.

Custom Base Enclosures to further lower the minimum work surface height are also available, removing the inside enclosure floor completely and allowing a minimum desk height of 22 7/16". Contact customer service for a quote.

On single piece hutches, the yardage requirement for two tackboards is the same as for one tackboard. Please keep this in mind when ordering more than one tackboard. For example, if the number of tackboards required is 7 and the COM requirement for 1 tackboard is 1.5 yards, the calculation for COM yardage is as follows: 4.5 yards are required for 6 tackboards + 1.5 yards for the 7th tackboard for a total of 6 yards. In the case of an even number of tackboards, divide the number of tackboards required by 2 and multiply that number by COM requirement on the chart. The fabric must be at least 54" wide in order to qualify for this procedure. If the fabric is less than 54" wide, the COM yardage listed on the chart is the amount required for each tackboard.

Quantity of Tackboards Required (example: 60")	Number of Yards Required per Tackboard (example: 60")	Number of Yards Required in Total (example: 60")
one	2 yards	2
two	2 yards	2
three	2 yards	4
four	2 yards	4
fiv	2 yards	6
six	2 yards	6
seven	2 yards	8
eight	2 yards	8

Customer Service Hours

Please note customer service hours are:
8:30 am to 5:00 pm est

Customer Satisfaction

It is the primary goal of Krug and our staff to ensure the complete satisfaction of our customers with our products and performance. If a problem arises with a Krug product after the expiration of the limited warranty period, Krug will exercise its best efforts to achieve the satisfaction of the customer in a manner that is fair to all concerned.

Order Acknowledgments

Each order will be acknowledged via e-mail or fax. This acknowledgment is the final agreement between Krug and the customer, superseding all previous communications regarding the purchase order. Where there is a discrepancy on a purchase order between a product code and a description, Krug will make every effort to resolve the discrepancy, but will be ruled by the product code ordered. Please check all acknowledgments for accuracy, and advise Krug of any discrepancies with a purchase order.

Order Cancellation

Krug reserves the right to not accept or allow cancellation of orders. All products are manufactured on a custom-made, make-to-order basis, and the purchasing, engineering and production of orders begins shortly after order placement - and the customer purchase order is a contract that authorizes Krug to manufacture the products. Acceptance of order cancellation (or partial cancellation) is solely at the discretion of Krug, and is dependent on the extent to which engineering, purchasing and manufacturing has been initiated by the time cancellation is requested. No order cancellations (partial or otherwise) are allowable more than 4 weeks from date of order placement (as order production is unable to be terminated by that point), and full payment of the acknowledged order value is required for any orders cancelled after 4 weeks. Cancellations may be allowable in less than 4 weeks after order placement, depending on the extent to which manufacturing has been initiated. An acceptance of order cancellation requires that the purchaser agrees to make payment for all costs incurred to the point of acceptance of cancellation. Cancellation charges include all costs for purchase of dedicated material and components, engineering costs for non-standard products, and all costs for manufacturing completed to that point, as well as a \$350 net charge for processing of the original order and for processing of cancellation invoicing.

Pricing

Krug endeavors to ensure that all prices in this price list reflect accurately our current prices. However, errors do occur and will be rectified through notices to the field. Krug reserves the right to acknowledge pricing that may be different from the price list.

Warranty

Krug warrants the construction and the finish of all our products to be free from defects in materials and workmanship for a period of 10 years from the date of purchase. This warranty is applicable to products in use by their original purchaser. This warranty does not apply to components not manufactured by Krug including textiles, which are subject to the specific warranties of those manufacturers,

if any. Textiles (fabric, leather, vinyl, or any other covering material) suppliers do not guarantee their products for durability and color fastness, and nor does Krug. Casters, mechanical and electrical components have a warranty of five years from the date of purchase. The Krug warranty does not apply to COM-specified materials, damage caused by a carrier other than Krug, or variation in wood finishes due to natural wood color variation. Krug cannot be held responsible for variations in fabric dye lots from order to order. All fabric is carefully inspected when it is received, but a degree of variation in color should be expected. Repairs or replacement of any defect covered under this warranty by Krug will be made, at our option and method, at no charge to the original purchaser during the warranty period. Krug's judgement is final and binding with respect to the nature or cause of defects or damage, and the necessity or manner of repair or replacement.

This warranty does not apply to defects or damage resulting from:

- normal wear and tear occurring with the use of the product
- negligence, misuse, excessive use, alteration, improper cleaning or repair
- substitution or use of incorrect or unauthorized components or material
- handling or installation that is incorrect, or that causes damage or defect
- damage incurred by a freight carrier other than Krug
- wearing of finishes and fabrics, and normal variations in material (including dye lot variations)
- properties of natural materials, including wood and leather
- exposure to environments with uncontrolled temperature and humidity (products must be transported, stored and used in climate-controlled conditions)

Note, specific warranties for components and materials not manufactured by Krug:

Height Adjustable Mechanism Warranty

Krug warrants to the original consumer purchaser its Height Adjustable Mechanism that it will be free from defects in material and workmanship. This limited warranty covers material and manufacturing defects, which cause a non-conformance in the function of a table base and is limited to the following products and warranty term determined from their dates of purchase:

- a) Electronic components such as control boxes, hand switches and motors – two (2) years
- b) Mechanical components such as crank drives, spindles – five (5) years
- c) Structural components such as J-channels, feet and top supports – ten (10) years

The start of the warranty period is the documented date of your purchase of the product. The warranty herein is made to and for the benefit of the original consumer purchaser of the product and is non-transferable. If you discover a defect in material or workmanship during the warranty period, and Krug agrees that the defect exists, Krug will, at its option, repair or replace the Product at no charge to you, provided it is returned during the warranty period. In the unlikely event that your product should require repair or replacement during the warranty period, please contact Krug to obtain warranty service. The warranty period on replacement products is the remainder of the warranty on the original product or 30 days, whichever is longer.

2. Docks at the selected delivery location must be equipped to handle a 53' trailer. If a dock is inadequate for delivery by Krug, Krug will re-deliver to another local location and any additional costs will be charged to the customer.
3. For all deliveries, it is understood that Krug or its agent is making a dock delivery only (equipped to handle a 53' trailer), and any further work of truck unloading, delivery beyond the dock, installation, and removal of packaging is not authorized or paid for by Krug.
4. Drop shipments to the installation site, and timed deliveries, are available on larger shipments (full truckloads or slightly less) at no additional charge. Drop shipments or timed deliveries for smaller shipments may not be available, or if available will require a surcharge. Deliveries on an after hours basis, or on weekends, or any other special requirements, may be subject to a surcharge. Location and contact information, and the requested time of delivery, is required at least one week prior to the acknowledged shipment date. If this information is not provided one week in advance, or if the location or time of the drop shipment is changed less than one week in advance, a surcharge may be applied, and/or the drop shipment may not be scheduled.
5. For all deliveries - whether to the Customer location or drop shipment - any circumstances that result in the delay of our carrier (including unsuitable receiving facilities, or facilities not open or available), service charges will be applied at the rate of \$75/hour. Where re-delivery is necessary because of these circumstances, the full cost of re-delivery will be charged. If Less Than Truck Load is delivering, one hour is allocated to unload. Any additional time required to unload after the first hour is \$75/hour. If a Truck Load is delivering the order, three hours is allocated to unload. Any additional time required to unload is \$75/hour. Direct deliveries to site for net orders are possible, must exceed \$60,000 net, and accommodate 48-53' trailers. Krug is responsible for delivery to the approved delivery address. If an address change is required, this must be authorized by Krug 5 business days prior to ship date. Any additional delivery costs incurred after this time will be charged to the customer. Additional costs for partial shipment of orders are the responsibility of the customer, and will be added to invoices. This includes any part shipment costs due to delays from textile suppliers. Additional costs for partial order shipments will normally not be assessed if there is a delay caused by Krug.

Damaged Shipments

All Krug product is well engineered, carefully inspected, and expertly loaded onto our trucks at our Distribution Center. If you receive any damaged freight, we ask that you do not refuse the shipment. Krug is not responsible for damage to goods that occurs in transit or storage. It is the purchaser and/or receiver's responsibility to examine the goods upon receipt and to notify Krug of any damages, overages or shortages. Any discrepancies should be noted on the Bill of Lading. The delivering carrier will not accept responsibility for shortages or damages if signed "clear". Notification of concealed damage claims must be made to Krug Distribution within 5 days of delivery, along with digital pictures if available. All product and

packaging must be available for inspection. Krug liability ceases after 5 business days and Krug will not be responsible for concealed damages if shipments are left unopened. Krug is not responsible for the condition of product that is stored or installed in an environment where temperature and humidity are not controlled.

Field Product Report Authorization

Krug's written authorization, in the form of an FPR number, must be obtained prior to incurring charges of any kind if Krug is expected to pay these charges. This includes authorization for returns, field repairs and replacements, post field repairs, installation and delivery charges. Krug reserves the right to have its representative inspect product related to any request for such authorizations, prior to that authorization being provided. Deductions from invoices paid for any charges to Krug, without prior written authorization in the form of an FPR, will not be accepted. Digital photographs may be required to complete the FPR process.

Care and Maintenance

Wood Finishes - Although Krug's extensive finishing process ensures a durable finish on all our products, there are several steps that can be taken to protect and prolong the life and beauty of the finish. Protect the top by placing felt pads on the bottom of any accessories and mechanical equipment. Rubber and oil will permanently mark surfaces. Use a desk pad to prevent possible damage and imprinting caused by writing instruments and sharp objects. Dust only with a clean, dry cloth, going with the grain. Clean any marks with a damp cloth, using a small quantity of mild soap or detergent. Do not use any wax-based polish, spray or silicone. Eventually, a film will build up and discolor the top. Do not place your furniture in a position of permanent exposure to direct sunlight.

Plastic Laminates - Clean plastic laminates with mild soap and warm water. Do not use steel wool, hot water, or any abrasive cleaning product.

Custom Capabilities

Over 15% of our orders involve some type of custom work, and we invite our customers to make use of our extensive capabilities. These include:

- 1) Dimensional customization of standard size products
 - 2) Custom wood finishes
 - 3) For larger orders, completely custom-designed products, as well as non-standard wood species can be specified.
- Custom orders may require additional production lead times. Contact Customer Service for more information.

When two upholstery selections are specified for use on seating, the higher grade upholstery price will apply to the order.

High Performance upholstery; Polyurethane, Vinyl or Crypton, is particularly suitable for healthcare and other intensive-use environments.

CASEGOODS PROGRAM

Orders for casegood products on the KrugExpress program may be subject to quantity maximums. Please contact Krug Customer Service for more information. Quantity maximums are dependent upon available capacity, in order to insure that we ship all orders on time. Only actual casegood pieces and conference tables tops and bases are considered “units”. Items such as tasklights, tackboards, keyboard trays and drawers, electrical and wire management components, etc., are not considered under the quantity restrictions. For example, a typical office configuration that includes a desk, linking unit, credenza and hutch/overhead, equals a total of four units for the purposes of the quantity maximum. Only Krug In-stock panel fabric is available on the KrugExpress program. Only standard wood finishes are available for KrugExpress orders. Grommets can be specified in standard positions only. KrugExpress also includes all Krug seating and occasional tables as well as Krug conference products to complement this casegoods offering.

CUSTOMER'S OWN MATERIAL - C.O.M.

Customer's Own Material (COM)

COM must be received three weeks prior to the acknowledged ship date. Orders with COM not received by the required deadline will be delayed.

A description of the fabric, including supplier name, fabric name and color number must be included with the purchase order. When the COM fabric is received at Krug, it must be clearly identified with the fabric name and color, and tagged with name of the Krug customer and purchase order number. Krug will inspect all COM fabric when received to determine if it will be suitable for upholstery. Where Krug feels that the fabric or leather specified will compromise the quality or integrity of our products, customers will be contacted to direct these concerns. Further, Krug reserves the right to refuse to accept and use any COM fabrics or leathers that will compromise our products in any way that is unacceptable to Krug. Krug cannot assume responsibility for the durability or tailoring quality of customer's own material.

Yardage specified in this price guide is approximate. In the case of multiple product orders, multiply the number of items by the COM yardage specified to determine fabric required, unless otherwise indicated. Additional yardage may be needed if the material is less than 54" wide, or patterned or striped and requires matching. As fabric is applied horizontally, non-directional fabrics are recommended. COM fabrics are applied as they come off the roll unless otherwise specified. All striped fabrics will be applied vertically unless otherwise stated by the customer and after approval by Krug. It is the customer's responsibility to advise Krug if the upholstery is to be applied otherwise, and to advise Krug of any special upholstery instructions. Special instructions should be sent to Krug Customer Service, including a sample (or photocopy) of the fabric. Krug is not responsible for instructions sent with the fabric rolls, or for the method of upholstery if no instructions have been provided. COM fabrics for tackboards may be specified in either Maharam or Momentum panel fabrics. Krug is not responsible for determining if a fabric is not ideal for tackboard application.

Please contact Maharam at 1-800-645-3943 or Momentum at

COM Shipping Procedures

For tackboard COM fabrics, please send fabrics to:

Krug Inc.

111 Ahrens Street

Kitchener, Ontario

Canada N2H 4C2

Attention: RECEIVER

All packages must be clearly marked "For Customs Clearance by Willson International Custom Brokers". According to the North American Free Trade Agreement (NAFTA), goods shipped between the United States and Canada can qualify for exemption from all duties, or for a reduction in duties, if the goods can be proven to originate in either the United States, Canada or Mexico.

Canada Customs requires that a NAFTA Certificate of Origin and Commercial Invoice be completed and sent with the fabric shipment. The Commercial Invoice must clearly state the description of the fabric, the selling price, the make-up or content, and the purchaser. The absence of these two documents will delay the shipments at the U.S./Canada border, thereby potentially delaying the customer order. If the total value of the shipment is less than \$1200 U.S., Customs will accept a Low Value Statement of Origin in place of the NAFTA Certificate of Origin. The Low Value Statement must be signed by a representative of the exporting company. This statement may either be included on the commercial invoice or attached to the invoice.

Krug is happy to answer any questions or concerns about COM shipping procedures and the required documents. Please contact our Customs Specialist at 1.888.578.5784.
