HEALTHCARE SOLUTIONS

HEALTHCARE EXPRESS

Krug's new **HEALTHCARE EXPRESS** program features 10 day, 15 day and 20 day leadtimes! This means the products offered here are available to ship 10, 15 or 20 days from the date a clean purchase order is received. Please note the actual acknowledged ship date is based on the next available truck after completion. **Quantity maximum of 40 total units per order. Available quantities and capacity may require additional leadtime.** Orders with multiple products will receive the longest of the leadtimes available for the products on the order.

10 DAY LEADTIME

SOLIS | GUEST & PATIENT

The result of an intensive, multi-year research and development process, Solis is one of the most advanced seating designs ever created for healing environments. Using evidence-based design, Solis has been created to address the complex criteria cited by specifiers, patients and caregiving staff for furnishing healthcare facilities.

Weight capacity:
Guest & Patient Chairs (21" & 24") - 500 lbs

- Urethane Colors: Black, Grey and Taupe.
- Silver Metallic finish.

CALLISTO | DESK AND CONFERENCE SEATING

Callisto has above all else been engineered to provide a comfortable and supportive seating experience. The back and seat forms were created using anthropomorphic research and leading-edge modeling software, promoting less muscle fatigue during extended periods of sitting. Callisto's proprietary synchro-tilt mechanism automatically adjusts tilt tension with the user's individual body weight, simultaneously providing optimal movement and support through a full range of positions.

Weight capacity: 300 lbs

JORDAN | LOUNGE

Jordan - defined as a "healing river" in ancient times - utilizes research-based curvature in both the seat and back to encourage correct yet comfortable sitting posture. "Waterfall" seat fronts and a canted seat angle are designed to help prevent discomfort for the user's hips and legs, promote good circulation while in a seated position, and assist ingress and egress. A unique sinuous spring suspension system provides exceptional comfort for the user, while also extending the life of seat foam - an important feature in high-traffic settings..

JORDAN | ACTIVE PATIENT RECLINERS

The Jordan Active Patient Recliner is lighter-scaled, lower weight and dimensionally smaller than most recliners, but maintains comfortable proportions for extended sitting, resting and treatment. Its smaller size and weight make it less burdensome to move and live with: at just over half the weight of our Jordan 3-Position full-scale recliner, the Active Patient is a recliner that is easier on caregivers, patients, and cleaning staff. It's the perfect solution for patient rooms and treatment areas where available space and freedom of movement are important. Four heavy-duty 3" diameter soft wheel casters are standard on the recliner. The front casters are inline and locking; the rear casters are swivel and not visible. This combination provides a noticeable and user-friendly ease of steering when the recliner is being moved.

Active Patient Recliner, 24", with Thermal Comfort	JOR6APR240100

Weight capacity: 350 lbs
 - Urethane Colors: Black, Grey and Taupe.

JORDAN | RECLINERS

We asked caregiving professionals and leading healthcare designers how we could build a better recliner, and the result is a product that has some unique solutions to very real and practical needs. We learned how hard it is for nurses to move these big, heavy chairs - so we made it lighter, and designed an ergonomic push bar as a standard feature to ease back strain. We learned that some recliners ordered without casters can cause problems, so we made soft-wheel, swivel, easy-to-lock casters a standard feature. And we designed the Jordan Recliner so that virtually every component can be field-replaced, because these chairs go through so much use and abuse.

JORDAN | LOUNGE SLEEPER

Jordan seating and tables have become an industry benchmark for healthcare environments - and now with the Jordan Sleepers, we are taking sleep seating products to a new level. It was only after several years of in-depth research and learning from healthcare professionals and specifiers, and after studying the competition closely, that we began the design of the Jordan Sleepers - and we were determined to create a truly exceptional product that provides real solutions to the challenges faced every day in care-giving environments.
