## Krug Finishes and Veneer

Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes we try to minimize variations however, some variation between samples and finished goods should be anticipated. Clear finishes complement natural grain and color characteristics that occur in high quality veneer selections. As a result, variations in color and grain should be anticipated when specifying clear finishes.

All products are air emissions certified and are available as FSC® certified
